"""

"""
Tuples
- Create tuple
- Indexing
- Access componenets
- Slicing
- Built in functions
- Combine multiple tuples
- Modify components
"""
"""
Tuples
- Consists of an ordered collection of objects
- Some of the operations on tuples are similar to lists
- Tuples are enclosed between parenthesis ()
- Immutable
- Once created they cannot be modified
"""
"""
Create tuples
- Create a tuple with Student RollNo, Name, marks, department details
"""
student_details = (1,'Ram',90,'Comp')
# print the tuple
print(student_details)
# (1, 'Ram', 90, 'Comp')

```
